

The law and the effect it has had on my family is immense!!!! I no longer have the daily annoyance of unsolicited telephone calls! I understand business have to thrive somehow, but advertising is the way people have been noticed in the past and should continue in the future. Especially in today's age of scams. If I want to do business with someone, it is much safer if I seek them out rather than have Joe Schmo call me and scam me. Not to mention the invasion of privacy a phone call coming in at dinner time is! Don't change this law and I hope other states take a stand on this issue...our homes are our havens, our escape from the business world...lets keep it that way! THANK YOU FOR LISTENING!
